

AMENDMENTS TO THE CLAIMS

1. (Original) A method of delivering information to a requesting user, said method comprising the steps of:
recording a request from a user pertaining to information content desired by said user;
accessing said recorded request by any information provider; and
determining by said accessing information provider whether or not the information said accessing provider has control of matches the information content requested by said user.
2. (Original) The method of claim 1 wherein said accessing information supplier accesses said information via the Internet.
3. (Original) The method of claim 1 wherein said accessing information supplier accesses said information via a connection from said provider directly to said user.
4. (Previously Presented) The method of claim 1 wherein said recording step includes providing user information to control the accessing of such requests by third parties.
5. (Original) The method of claim 1 further including the step of:
under at least partial control of said determining step delivering the information desired by said user.
6. (Original) The method of claim 5 wherein said delivering step includes the step of:
interacting between said accessing provider and said user as to the nature of the information to be delivered.
7. (Original) The method of claim 6 wherein said interacting is selected from the list including:
time of delivery, media for delivery, content of delivery, location for delivery, follow up after delivery, payment information, respective obligation requirements, comparing access permissions.
8. (Original) The method of claim 6 wherein said interacting step can occur in a media different from the media under which said information is delivered.

9. (Original) The method of claim 5 wherein said delivering step includes the step of:

making adjustments for one or more factors selected from the list including time, location, media.

10. (Original) The method of claim 9 wherein said adjustment is made based on the context of the desired information.

11. (Original) The method of claim 9 wherein said adjustment is made based on the location of the user.

12. (Original) The method of claim 1 wherein said information to be delivered is entertainment media.

13. (Original) The method of claim 1 wherein said information is recorded local to said user and from time to time transmitted to a remote location.

14. (Original) The method of claim 1 wherein said information is recorded locally and accessible from time to time from remote locations by said accessing providers.

15. (Original) The method of claim 1 wherein said information is recorded locally and sent to one or more remote locations for accessing by said accessing providers.

16. (Original) The method of claim 1 wherein said information is initially recorded at a location remote from said user.

17. (Original) The method of claim 16 wherein said recorded information is available for accessing by said accessing providers at one or more locations remote from said user.

18. (Original) The method of claim 1 wherein the information desired by said user is not currently available.

19. (Original) The method of claim 1 wherein the information desired pertains to future events not scheduled at the time said request is recorded.

20. (Original) The system of delivering information to a requesting user, said system comprising:

means for recording a request from a user pertaining to information content desired by said user;

means for accessing said recorded request by any information provider; and

means for determining by said accessing information provider whether or not the information said accessing provider has control of matches the information content requested by said user.

21. (Original) The system of claim 20 further including:

means operable under at least partial control of said determining means for delivering the information desired by said user.

22. (Original) The system of claim 21 wherein said delivering means includes:

means for interacting between said accessing provider and said user for determining the nature of the information to be delivered.

23. (Original) The system of claim 21 wherein said delivering means includes:

means for making adjustments for factors selected from the list including time, location, media.

24. (Original) The system of claim 23 wherein said adjustment is made based on the context of the desired information.

25. (Original) The system of claim 23 wherein said adjustment is made based on the location of the user.

26. (Original) The system of claim 20 wherein said accessing means includes:

means for matching a permission level of a recorded request against a permission level of an accessing party.

27. (Withdrawn) A method for allowing a TV user to receive programs desired by that user, said method comprising the steps of:

accepting from said user information pertaining to a program desired to be viewed by said user;

matching said accepted information against a list of known programs currently scheduled to be delivered;

informing the user as to when said programs will be delivered; and
allowing the viewer to receive said programs at the informed time.

28. (Withdrawn) The method of claim 27 wherein said information is selected from the list including future programs, past programs, past events, program concepts, biographies, actors, travelogues, subject matter, movies, concerts, performers, time frames, sitcoms, sports, affinity programs, historical figures, news events, programs not yet scheduled.

29. (Withdrawn) The method of claim 27 further comprising the step of:
upon a non-match condition making said user request available to at least one content provider.

30. (Withdrawn) The method of claim 29 further comprising the step of:
delivering programs to said user from said content provider which match said accepted descriptive material.

31. (Withdrawn) The method of claim 29 further comprising the step of:
interacting between said at least one content provider and said user to deliver content containing said descriptive material to said user.

32. (Withdrawn) The method of claim 27 further comprising the step of:
upon a non-match condition continuing to match said accepted information against future lists of programs scheduled to be delivered.

33. (Withdrawn) The method of claim 27 further comprising the step of:
upon a non-match condition continuing to match said accepted information is against possible future programs not yet scheduled.

34. (Withdrawn) The method of claim 27 further comprising the step of:
enabling a recorder at said user's location to record said programs when matched ones of said programs are delivered.

35. (Withdrawn) The method of claim 34 further comprising the step of:
adjusting the timing of the recording in accordance with the location of the user.

36. (Withdrawn) The method of claim 34 further comprising the step of:
adjusting the recording time at said user's location in accordance with information
concerning the actual transmission times of programs being recorded.

37. (Withdrawn) The method of claim 27 wherein said matching step includes the
step of
comparing a provider's identity against a permission level set by said TV user.

38. (Withdrawn) A system for delivering entertainment programs to a user, said
system comprising:

means for allowing said user to input and store desired programs;

means operative from time to time for accessing stored ones of said desired programs;

means for determining which, if any, of said stored desired programs are currently
available to said user; and

means controlled in part by said accessing means for delivering to said user one or
more of said stored desired programs which were determined not to have been currently
available to said user, after said programs are determined to be available.

39. (Withdrawn) The system of claim 38 wherein said delivering means includes
means for:

allowing at least one program provider to review said stored list to determine if said
program provider can deliver to said user one or more of said desired stored programs.

40. (Withdrawn) The system of claim 39 wherein said allowing means is further
operative to allow one or more program providers to review said stored list for periods of
time.

41. (Withdrawn) The system of claim 39 wherein said accessing means is at a
first location and said program provider is at a second location remote from said accessing
means.

42. (Withdrawn) The system of claim 38 wherein said programs are selected from the list including future programs, past programs, past events, program concepts, biographies, actors, travelogues, subject matter, movies, concerts, performers, time frames, sitcoms, sports, affinity programs, historical figures, news events.

43. (Withdrawn) The system of claim 38 further including:
means for controlling recording times of delivered ones of said desired programs in accordance with the actual delivered time of such program at a user's location.

44. (Original) The system for providing information to a user, said information available over a network, said system comprising:
means for allowing said user to input and store an abstract of the desired information;
means operative from time to time for allowing any party other than said user to have access to said abstract of said desired information; and
means for allowing those of said other parties having information fulfilling said abstracted information to deliver to said user said fulfilling information.

45. (Original) The system of claim 44 wherein said fulfilling information was not available at the time said user stored said abstract of said desired information.

46. (Original) The system of claim 44 wherein said delivery allowing means includes means for interacting between the user and said accessing parties to determine one or more of the following, scope of the information content to deliver, time of delivery, mode of delivery, location of delivery, cost of the information, respective liabilities of the parties with respect to the delivered information, limitations on the use of said delivered information.

47. (Original) The system of claim 44 wherein said allowing means includes flagging certain data at said user's location.

48. (Original) The system of claim 44 wherein said allowing means includes storing said inputted abstracted desired information at least one site remote from said user.

49. (Original) The system of claim 44 wherein said delivering means includes means for modifying the information in accordance with the user's location.

50. (Original) The system of claim 44 wherein said delivering means includes means for delivering the information in a media context consistent with the user's ability to receive the information at the time of delivery.

51. (Original) The system of claim 44 wherein said system allowing means includes means for controlling which set of parties may access said desired information.

52. (Withdrawn) The method of delivering information from any of a plurality of information sources to an information seeker wherein each said information seeker has caused to be remembered abstracts of information being sought by said information seeker, said method comprising the steps of:

searching from time to time by said information sources a plurality of said information seekers to determine whether information available to at least one of said sources matches the abstracts of sought information; and

notifying said information seeker that at least one match has been found.

53. (Withdrawn) The method of delivering information as set forth in claim 52 wherein said remembered information is searchable by said information sources for a period of time.

54. (Withdrawn) The method of delivering information as set forth in claim 53 wherein said information is communicated as a result of an interactive exchange between said source and said seeker.

55. (Withdrawn) The method of delivering information as set forth in claim 52 wherein the information is communicated from a third party to said information seeker under at least partial control of said information source.

56. (Withdrawn) The method of delivering information as set forth in claim 55 wherein said information is communicated as a result of an interactive exchange between said third party and said seeker.

57. (Withdrawn) The method of delivering information as set forth in claim 52 wherein the information is communicated to a location designated by said information seeker.

58. (Withdrawn) The method of delivering information as set forth in claim 52 further comprising the steps of:

communicating from said information source to said information seeker the location to where said sought information is to be found.

59. (Withdrawn) The method of delivering information as set forth in claim 58 further comprising the steps of:

downloading said sought information under control of said information seeker using said communicated information from said information source.

60. (Withdrawn) The method of claim 52 wherein said searching step includes the step of:

matching permission levels between said information seekers and said information sources.

61. (Previously Presented) A method of delivering information to a requesting user, said method comprising the steps of:

storing requests from users, said requests pertaining to information content desired by said users;

accessing said stored requests by information providers; and

determining by an accessing provider whether or not said accessing provider has control of information which matches an accessed stored request.

62. (Previously Presented) The invention of claim 61 further including the step of:

providing information in accordance with stored requests under control of said accessing provider.

63. (Previously Presented) The invention set forth in claim 62 further including the step of:

under control of said request storing user determining if said storing user will accept information provided by said accessing user.

64. (Previously Presented) The invention set forth in claim 61 wherein said stored requests pertain to information not available to said storing user at the time of said storing.

65. (Previously Presented) The invention set forth in claim 61 wherein said stored requests pertain to information not in existence at the time of said storing.

66. (Previously Presented) The invention set forth in claim 61 wherein said determining step includes the step of:
under control of an accessing provider generating information for delivery to said storing user pertaining to at least one stored request of said storing user.

67. (Previously Presented) The invention set forth in claim 66 further including the step of:
allowing said storing user to control whether or not information will be received by said storing user.

68. (Previously Presented) The invention set forth in claim 33 further comprising the step of:
enabling a recorder at said user's location to record said programs when matched ones of said programs are delivered.

69. (Previously Presented) The method of claim 61 wherein said user requests arrive over the Internet.

70. (Previously Presented) The method of claim 61 wherein said user requests arrive over a first communication service, and wherein said information is provided to said user over a second communication service different from said first communication service.

71. (Previously Presented) The method of providing to a user information pertaining to geographically diverse locations, said method comprising the steps of:
providing under control of any user an identity of an enterprise, said enterprise having a plurality of geographically diverse locations;
storing provided ones of said enterprise identities; and
accessing said stored provided ones of said identities by said enterprise so as to be able to provide each said user with information specific to an enterprise location at a current location of said user.

72. (Previously Presented) The method of claim 71 further including the step of: sending to each said user said specific information.

73. (Previously Presented) The method of claim 72 wherein said sending step includes an e-mail message specific to said user.

74. (Previously Presented) The method of claim 72 wherein said sending step includes sending a broadcast message to all users within said current location.

75. (Previously Presented) The method of claim 1 further including the step of communicating to said user that a match has been determined.

76. (Previously Presented) The method of claim 75 wherein said communication step includes an e-mail message.

77. (Previously Presented) The method of claim 75 wherein said communication step includes a wireless communication.

78. (Previously Presented) The method of claim 1 wherein said recording step includes the step of receiving said requests over a medium different from the medium in which the requested information content is to be returned to said user.

79. (Withdrawn) The method of claim 27 wherein said accepting step includes accepting said user information over the Internet.

80. (Withdrawn) The method of claim 27 wherein said informing step includes sending an e-mail message to said user.

81. (New) A system for delivering entertainment information to a user, said system comprising:

means for allowing said user to record requests for desired entertainment information;
means operative from time to time by an entertainment provider for accessing recorded ones of said user requests;

means for determining by said accessing provider which, if any, of said entertainment information pertaining to said user recorded requests currently available to said user by said accessing provider; and

means controlled in part by said accessing provider for delivering to said user one or more of said entertainment information pertaining to said user recorded requests which were determined not to have been currently available to said user, after said entertainment information is determined to be available.

82. (New) The system of claim 81 wherein said accessing means is further operative to allow more than one information provider to review said recorded requests for periods of time.

83. (New) The system of claim 81 wherein said accessing means is at a first location and said entertainment information provider is at a second location remote from said accessing means.

84. (New) The system of claim 81 wherein said entertainment information is selected from the list including future entertainment information: past entertainment information, past events, entertainment concepts, biographies, actors, travelogues, subject matter, movies, concerts, performers, time frames, sitcoms, sports, affinity programs, historical figures, news events.

85. (New) The system of claim 81 further including:
means for controlling recording times of delivered ones of said desired entertainment information in accordance with the actual delivered time of such entertainment information at a user's location.

86. (New) A method for allowing a TV user to receive programs desired by said user, said method comprising the steps of:
recording by said user requests pertaining to a program desired to be viewed by said user;
accessing recorded ones of said requests by a party other than said user;
determining by said other party whether or not a desired program is available;
informing said user as to when a determined available said program will be delivered;
and
allowing the viewer to receive said programs at the informed time.

87. (New) The method of claim 86 wherein said requests pertain to programs selected from the list including: future programs, past programs, past events, program concepts, biographies, actors, travelogues, subject matter, movies, concerts, performers, time frames, sitcoms, sports, affinity programs, historical figures, news events, programs not yet scheduled.

88. (New) The method of claim 86 further comprising the step of:
upon a determined unavailable program making said user request available to at least one content provider.

89. (New) The method of claim 88 further comprising the step of:
delivering programs to said user from said content provider when said content provider determines it has information matching a recorded request.

90. (New) The method of claim 89 further comprising the step of:
interacting between said at least one content provider and said user to deliver to said user said information matching a recorded request.

91. (New) The method of claim 86 further comprising the step of:
upon a determined unavailable program, continuing to match said requests against subsequently scheduled programs.

92. (New) The method of claim 91 further comprising the step of:
enabling a recorder at said user's location to record programs when a match is determined with a subsequently scheduled program.

93. (New) The method of claim 86 further comprising the step of:
enabling a recorder at said user's location to record received ones of said programs.

94. (New) The method of claim 93 further comprising the step of:
adjusting the timing of said recording in accordance with the location of the user.

95. (New) The method of claim 93 further comprising the step of:
adjusting the recording time duration in accordance with information concerning the actual transmission times of programs being recorded.

96. (New) The system of claim 44 wherein said any party other than said user is a party not targeted by said user at the time said abstract is stored.
